

Define earth materials and explain why natural earth materials are important and must be protected. What are natural resources?

Layered Notebook Foldable: Cut out the templates, stacking them together in order, title template on top. Fold anchor tabs backward and forward. Starting with the bottom template, glue anchor tab onto lower portion of notebook page. One at a time, glue anchor tabs just above previous template until layers are complete. **BP** Observe and discuss the three photographs and read their titles. **S** On the back of each tab, describe and list examples of as naturally occurring Earth materials that are solids, liquids, and gases. How is each important to living organisms? **X** List and describe other natural resources as Earth materials.
